

**Privacy and Civil Liberties Impact Assessment (PCLIA)
for the
Data Management Module (DMM)**

Publication Date: 07-18-2025

Reviewing Official

Bureau Privacy and Civil Library Officer

BUREAU OF ENGRAVING AND PRINTING

Risk Level

This PCLIA is for an information system or IT rated "Moderate" or "High" impact for confidentiality under Federal Information Processing Standard 199, at least in part because of its PII content.

The estimated number of individuals whose PII is maintained in the system is 1,000 - 9,999

Section 1: Introduction

PCLIAs are required for all systems and projects that collect, maintain, or disseminate personally identifiable information (PII). The system owner completed this assessment pursuant to Section 208 of the E-Government Act of 2002 ("E-Gov Act"), 44 U.S.C. § 3501, Office of the Management and Budget (OMB) Memorandum 03-22, "OMB Guidance for Implementing the Privacy Provisions of the E-Government Act of 2002," and Treasury Directive 25-07, "Privacy and Civil Liberties Impact Assessment (PCLIA)," which requires Treasury Offices and Bureaus to conduct a PCLIA before: (1) developing or procuring information technology (IT) systems or projects that collect, maintain or disseminate PII from or about members of the public, or (2) initiating a new collection of information that: (a) will be collected, maintained, or disseminated using IT; and (b) includes any PII permitting the physical or online contacting of a specific individual, if identical questions have been posed to, or identical reporting requirements imposed on, 10 or more persons (not including agencies, instrumentalities, or employees of the federal government).

It is the policy of the Department of the Treasury ("Treasury" or "Department") and its Bureaus to conduct a PCLIA when PII is maintained in a system or by a project. This PCLIA provides the following information regarding the system or project: (1) an overview of its purpose and functions; (2) a description of the information collected; (3) a description of the how information is maintained, used, and shared; (4) an assessment of whether the system or project is in compliance with federal requirements that support information privacy; and (5) an overview of the redress/complaint procedures available to individuals who may be affected by the use or sharing of information by the system or project.

Section 2: Artificial Intelligence (AI)

Pursuant to the Executive Order on the Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence:

1. The term "artificial intelligence" or "AI" has the meaning set forth in 15 U.S.C. 9401(3): a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations, or decisions influencing real or virtual environments. Artificial intelligence systems use machine- and human-based inputs to perceive real and virtual environments; abstract such perceptions into models through analysis in an automated manner; and use model inference to formulate options for information or action.

2.The term “AI model” means a component of an information system that implements AI technology and uses computational, statistical, or machine-learning techniques to produce outputs from a given set of inputs.

3.The term “AI red-teaming” means a structured testing effort to find flaws and vulnerabilities in an AI system, often in a controlled environment and in collaboration with developers of AI. Artificial Intelligence red-teaming is most often performed by dedicated “red teams” that adopt adversarial methods to identify flaws and vulnerabilities, such as harmful or discriminatory outputs from an AI system, unforeseen or undesirable system behaviors, limitations, or potential risks associated with the misuse of the system.

4.The term “AI system” means any data system, software, hardware, application, tool, or utility that operates in whole or in part using AI.

5.The term “crime forecasting” means the use of analytical techniques to attempt to predict future crimes or crime-related information. It can include machine-generated predictions that use algorithms to analyze large volumes of data, as well as other forecasts that are generated without machines and based on statistics, such as historical crime statistics.

The Department of the Treasury is leveraging AI to better serve the public across a wide array of use cases and benefits delivery. Treasury is also establishing strong guardrails to ensure its use of AI keeps individual safe and doesn't violate their rights.

This PCLIA is being conducted on:

None of the above. (Please continue with this template if checked).

Section 3: System Overview

Section 3.1: System Description and Purpose

1. The *Office of Enterprise Solution* that own(s) or is funding the system, technology, pilot, rule, program, or other collection (hereinafter referred to as the “system”) is conducting this PCLIA for the *Data Management Module (DMM)* The program is conducting a PCLIA for this system for the first time.
2. The main purpose of this *Data Management Module (DMM)* is to help the program meet its mission by *The Data Management Module (DMM) suite of applications, including the Enterprise Service Bus (ESB)*,

are critical components of the Bureau of Engraving and Printing (BEP) Enterprise program. DMM enables real-time currency production data collection, notification and alerting, and reporting functionality at both the Eastern Currency Facility (ECF) and Western Currency Facility (WCF). DMM leverages custom data collection agents to perform real-time data collection from currency production presses, inspection equipment, and sensors. . This system also allows the program to The Data Management Module (DMM) suite of applications, including the Enterprise Service Bus (ESB), are critical components of the Bureau of Engraving and Printing (BEP) Manufacturing Executing System (MES) program. DMM enables near real-time currency production data collection, notification and alerting, and reporting functionality at both the Eastern Currency Facility (ECF) and Western Currency Facility (WCF). DMM leverages custom data collecting agents to perform near real-time data collection from currency production presses, inspection equipment, and sensors. The ESB enables message processing and bi-directional communication for various BEP and MES systems. The ESB Alarms system sends custom email alert notifications to BEP stakeholders based on predefined rules. BEP Reporting (BR) is a solution also deployed as a component of the BEP MES program and enables custom ad-hoc reports, and dashboards at both ECF and WCF. BEP Reporting utilizes DMM production data, which is transferred to an enterprise data warehouse for analytical reporting via the Oracle Data Integrator (ODI) extract-transform-load (ETL) tool. Oracle Analytics Server (OAS) is used to provide reporting capabilities against the Data Warehouse, including interactive dashboards, full ad-hoc, proactive intelligence and alert, enterprise reporting, and disconnected analytics. This functionality will be deployed in a phased approach. Security testing will align with the BEP deployment schedule and only test the new functionality that is implemented for each deployment. Tableau Server is another component of the Bureau of BEP MES program. It enables enterprise-wide analytics by providing users with a central platform for sharing and interacting with data visualizations and insights at both ECF and WCF. Tableau Server is used in tandem with Tableau Desktop, which is a separate application that allows users to create workbooks, views, dashboards and data sources for publishing and sharing. System Components: DMM, BEP Reporting, and Tableau Server components are located at both ECF and WCF. The ECF Production virtual local area network (VLAN) hosts the DMM custom data collection agents (SCADA, OCIS, AcuGage, Impression Count, LinorTek, Dalmar), ESB database, Oracle Service Bus, Data Warehouse database, ODI server, Reporting server, Tableau Server, and the failover (standby) WCF DMM custom data collection agents. The WCF Production VLAN hosts the DMM custom data collection agents (MetaSys/RTO, OCIS, Acugage, LinorTek, Dalmar), the failover (standby) DMM components: ESB database, and the BEP Reporting components: Data Warehouse database, ODI server, OAS server and Tableau Server. The WCF SBC VLAN hosts the single board computers that collect data from WCF currency production floor sensors and the DMM Metasys custom data collection agent. Each facility also contains an iSCSI enterprise data storage solution (outside the accreditation boundary of DMM, BEP Reporting, and Tableau). End users access BEP Reporting (OAS and Tableau Server) from their BEP workstation through a web browser. Users are automatically authenticated to the system, via SSO. OAS and Tableau Server administrators have a separate administrator account to access the systems. Further detail on role based access control can be found in the Role Based Access Control section below. The attached network diagram illustrates the accreditation boundary (shaded in the blue background) of DMM, BEP Reporting, and Tableau Server.

3. The system is comprised of the following components: ESB ESB Database DMM Custom Agents ODI Reporting Data Warehouse Tableau Server .
4. The Office of Enterprise Solution maintains personally identifiable information (PII) in the following system components: ESB ESB Database DMM Custom Agents ODI BEP Reporting Data Warehouse Tableau Server
5. The Office of Enterprise Solution collects/receives PII maintained in the system from:
 - a. PII is not collected directly from individuals.
 - b. DMM receives PII from Identity Manager (IDM), Manufacturing Execution Console (MES), and Manufacturing Support Suite (MSS). This PII contains information about employees and contractors.

6. The *Office of Enterprise Solution* uses the information in the system to: DMM (ESB, ESB Database, DMM Custom Agents, ODI, Data Warehouse): Exchange information between systems; stores information between systems for diagnostics, recovery, and data retention. Tableau Server: Ingests the information in order to develop data visualizations and dashboards while redacting sensitive information for end users. BEP Reporting: Ingests the information for reporting purposes.
7. The *Office of Enterprise Solution* discloses the information in the system to the extent required by the Freedom of Information Act and as allowed by the Privacy Act of 1974 (including the routine uses in the applicable SORN: Collection and processing of system user account PII data is covered under the following SORN: Treasury .015. General Information Technology Access and Accounts Records.
8. The *Office of Enterprise Solution* identified the following privacy risks during collection, use, and disclosure: If proper safeguards are not in place, there is a risk of PII exposure during its collection, use, and disclosure. There is a risk of exposure to those without a need-to-know within BEP and unintended recipients outside BEP.
9. The *Office of Enterprise Solution* has taken the following steps/implemented the following controls to protect the PII in the system during the collection, use, and disclosure: DMM Data Collection Agents, ESB and ESB database- Collection: DMM Data Collection Agents, ESB and ESB database does not collect any PII. Use: Information processed and maintained by DMM is encrypted while in transit and at rest. Disclosure: DMM does not disclose PII to external or internal parties because there is no PII stored in DMM Data Collection Agents, ESB or ESB databases. BEP Reporting- Collection: The BEP Reporting collects PII, which is secured by VPN. Data transmission is limited to only pre-authorized endpoints. Endpoints are protected by credentials through Active Directory (AD). These controls mitigate the risk of PII exposure during data collection. Use: The use of BEP Reporting is managed through role-based access controls within the application. Only authorized users are allowed to access PII on a need-to-know basis. Users must request and be approved to access roles that can view PII. Automated provisioning via IDM ensures only approved users can use PII. Disclosure: Role-based access and approval process prevents the disclosure of PII to unauthorized users. BEP Reporting is authorized to receive and disclose data only on a need-to-know basis. Disclosure of PII is strictly limited to authorized users. Tableau- Collection: The Tableau Server collects PII, which is secured by VPN. Data transmission is limited to only pre-authorized endpoints. Endpoints are protected by credentials through Active Directory (AD). These controls mitigate the risk of PII exposure during data collection. Use: The use of PII in Tableau Server is managed through role-based access controls within the application. Only authorized users are allowed to access PII on a need-to-know basis. Users must request and be approved to access roles that can view PII. Automated provisioning via IDM ensures only approved users can use PII. Disclosure: Role-based access and approval process prevents the disclosure of PII to unauthorized users. Tableau Server is authorized to receive and disclose data only on a need-to-know basis. Disclosure of PII is strictly limited to authorized users.

Section 3.2: Authority to Collect

Federal agencies must have proper authority before initiating a collection of information. The authority is sometimes granted by a specific statute, by Executive order (EO) of the President or other authority. The following specific authorities authorize Data Management Module (DMM) to collect information:

- 44 U.S.C. § 3101; E.O. 9397, as amended by E.O. 13487; and 44 U.S.C. § 3554

The information may also be collected pursuant to a more general requirement or authority. All Treasury systems and projects derive general authority to collect information from:

- 31 U.S.C. 321 – General authorities of the Secretary establish the mission of the Department of the Treasury
- 5 U.S.C. 301 – Department regulations for the operations of the department, conduct of employees, distribution and performance of its business, the custody, use, and preservation of its records, papers, and property.

Section 3.3: Privacy Act Applicability; SORN Requirement

Under certain circumstances, federal agencies are allowed to exempt a system of records from certain provisions in the Privacy Act. This means that, with respect to information systems and papers files that maintain records in that system of records, the agency will not be required to comply with the requirements in Privacy Act provisions that are properly exempted. If this system or project contains records covered by the Privacy Act, the applicable Privacy Act system of records notice(s) (SORNs) (there may be more than one) that cover the records in this system or project must list the exemptions claimed for the system of records (it will typically say: “*Exemptions Claimed for the System*” or words to that effect).

Section 3.3.1 - 3.3.4

- The system does retrieve records about an individual using an identifying number, symbol, or other identifying particular assigned to the individual. A SORN is required with respect to the records in this system.

Section 4: Information Collection

Section 4.1: Relevant and Necessary

The Privacy Act requires “each agency that maintains a system of records [to] maintain in its [records](#) only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President.” 5 U.S.C. § 552a (e)(1). It allows federal agencies to exempt records from certain requirements (including the relevant and necessary requirement) under certain conditions. 5 U.S.C. §552a (k). The proposed exemption must be described in a Notice of Proposed Rulemaking (“NPRM”). In the context of the Privacy Act, the purpose of the NPRM is to give the public notice of a Privacy Act exemption claimed for a system of records and solicit public opinion on the proposed exemption. After addressing any public concerns raised in response to the NPRM, the agency must issue a Final Rule. It is possible for some, but not all, of the records maintained in the system or by the project to be exempted from the Privacy Act through the NPRM/Final Rule process.

Section 4.1.1 Exemption Claimed from this Requirement?

- The PII maintained in this system or by this project is not exempt from 5 U.S.C. § 552a(e)(1), the Privacy Act's requirement that an agency maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required to be accomplished by statute or by executive order of the President.

Section 4.1.2 Continuously Assessing Relevance and Necessity

- PII is limited to relevant and necessary data, reviewed at every PCLIA validation

Section 4.2: PII and/or information types or groupings

The list below represent the types of information maintained in the system or by the project that are relevant and necessary for the information system or project to fulfill its mission. PII identified below is used by the system or project to fulfill the purpose stated in Section 2.2 above– Authority to Collect.

Biographical/general information

<input checked="" type="checkbox"/> Business Email Address	<input checked="" type="checkbox"/> Name	<input checked="" type="checkbox"/> User Names, Avatars, etc.
N/A		

Identifying numbers assigned to individuals

<input checked="" type="checkbox"/> Internet Protocol (IP) address	<input checked="" type="checkbox"/> Personal device identifiers or serial numbers
--	---

Specific Information/File Types

N/A

Audit Log and Security Monitoring Information

<input checked="" type="checkbox"/> Contents of files accessed by user of Treasury IT	<input checked="" type="checkbox"/> Date and time individual accesses IT	<input checked="" type="checkbox"/> Files accessed by user of Treasury IT
---	--	---

<input checked="" type="checkbox"/> Internet or other queries by users of Treasury IT	<input checked="" type="checkbox"/> User ID assigned to a user of Treasury IT	<input checked="" type="checkbox"/> Other (please describe): system actions by admins
---	---	---

Medical/Emergency Information Regarding Individuals

N/A

Biometrics/Distinguishing Features/Characteristics of Individuals

N/A

Identifying numbers for sole proprietors (including business information)

N/A

Section 4.3: Sources from which PII is obtained

Focusing on the context in which the data was collected and used (i.e., why it is collected and how it is used), list **ALL** sources from which PII is collected/received and stored in the system or used in the project

Members of the Public

Federal contractors, grantees, interns, detailees etc: Federal contractors, grantees, interns, detailees, etc. ;

Current Federal Employees, Interns, and Detailees

Current Federal employees providing information in their capacity as federal employees;

Section 4.4: Privacy and/or civil liberties risks related to collection

When Federal agencies request information from an individual that will be maintained in a [system of records](#), they must inform the individual of the following: “(A) the authority (whether granted by statute, or by executive order of the President) which authorizes the solicitation of the information and whether disclosure of such information is mandatory or voluntary; (B) the principal purpose or purposes for which the information is intended to be used; (C) the [routine uses](#) which may be made of the information, as published pursuant to paragraph (4)(D) of this subsection; and (D) the effects on [the individual], if any, of not providing all or any part of the requested information.” 5 U.S.C § 522a(e)(3). This is commonly called a Privacy Act Statement.

The OMB Guidelines also note that subsection (e)(3) is applicable to both written and oral (i.e., interview) solicitations of personal information. Therefore, even if a federal employee or contractor has a fixed list of questions that they orally ask the individual in order to collect their information, this requirement applies.

Section 4.4.1 Collection Directly from the Individual to whom the PII pertains

- None of the PII in the system was collected directly from an individual to whom it pertains: DMM: PII is collected from other systems, which require communication through the ESB. DMM also collects and stores work email addresses in the ESBMail database for alert notifications from some of the DMM agents. Tableau: It is ingested from the application sources, such as MEC/MSS, as well as shared files (Excel and CSV files) hosted on the BEP network that contain data collected by individual BEP stakeholders. BR: It is ingested from the application sources, such as MEC/MSS and DMM.

4.4.2 Privacy Act Statements

- None of the PII in the system was collected directly from the individuals to whom it pertains. Therefore, a Privacy Act Statement is not required.

Section 4.4.3 Use of Full Social Security Numbers

Treasury is committed to eliminating unnecessary collection, use, and display of full Social Security numbers ('SSN') and redacting, truncating, and anonymizing SSNs in systems and documents to limit their accessibility to individuals who do not have a need to access the full SSN in order to perform their official duties. Moreover, the Privacy Act provides that: 'It shall be unlawful for any Federal, State or local government agency to deny to any individual any right, benefit, or privilege provided by law because of such individual's refusal to disclose his social security account number.' Pub. L. No. 93-579, § 7. This provision does not apply to: (1) any disclosure which is required by federal statute; or (2) any disclosure of an SSN to any federal, state, or local agency maintaining a system of records in existence and operating before January 1, 1975, if such disclosure was required under statute or regulation adopted prior to such date to verify the identity of an individual. Id. at § 7(a)(2)(A)-(B).

Section 4.4.4 Justification for collection and use of full Social Security Numbers

- N/A No full SSNs are maintained in the system. Explain if any portion of the SSN short of the full 9 digits is used in the system: DMM, BR, and Tableau applications do not maintain full SSN.

Section 4.4.5 Controls implemented to limit access to and or improper disclosure of full Social Security Numbers

- Full SSNs are not maintained in the system or by the project.

Section 4.4.7 Denial of rights, benefits, or privileges for refusing to disclose Social Security Number

- N/A No SSNs are maintained in the system or by the project.

Section 4.4.8 Records describing how individuals exercise First Amendment rights

The Privacy Act requires that Federal agencies "maintain no record describing how any individual exercises

rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual about whom the record is maintained or unless pertinent to and within the scope of an authorized law enforcement activity." 5 U.S.C. § 552a(e)(7).

- N/A. The system *does not* maintain information describing how an individual exercises their rights guaranteed by the First Amendment.

Section 5: Maintenance, use, and sharing of the information

Ensuring accuracy, completeness, and timeliness of information collected, maintained, and shared when it is used to make determinations about individuals

The Privacy Act and Treasury policy require that Treasury bureaus and offices take additional care when collecting and maintaining information about individuals when it will be used to make determinations about those individuals (e.g., whether they will receive a federal benefit). This includes collecting information directly from the individual where practicable and ensuring that the information is accurate, relevant, timely and complete to assure fairness to the individual when making a determination about them. This section addresses the controls/protections put in place to address these issues.

The [Privacy Act](#) requires that Federal agencies “maintain all records which are used by the agency in making any determination about any individual with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the determination.” 5 U.S.C § 552a(e)(5). If a particular [system of records](#) meets certain requirements (including the [NPRM](#) process defined in Section 3.1 above), an agency may exempt the [system of records](#) (or a portion of the records) from this requirement. Exemptions may be found at the bottom of the relevant SORN next to the heading: “*Exemptions Claimed for this System.*”

Section 5.1 Exemption from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act

- *None* of the information maintained in the system that is part of a system of records is exempt from the accuracy, relevance, timeliness, and completeness requirements in section (e)(5) of the Privacy Act.

Section 5.2 Protections in place despite exemption from the accuracy, relevance, timeliness, and completeness requirements

- *None* of the information maintained in the system that is part of a system of records is exempt.

Section 5.3 Collecting information directly from the individual when using it to make adverse determinations about them.

Section 552a(e)(2) of the Privacy Act requires that Federal agencies that maintain records in a system of records are required to collect information to the greatest extent practicable directly from the individual when the information about them may result in adverse determinations about their rights, benefits, and privileges under

Federal programs. Agencies may exempt a system of records from this requirement under certain circumstances and if certain conditions are met.

Section 5.4 Additional controls designed to ensure accuracy, completeness, timeliness and fairness to individuals in making adverse determinations

1. *Administrative Controls*

Individuals about whom information is collected are given the following opportunities to amend/correct/update their information to ensure it is accurate, timely and complete to the extent reasonably necessary to assure fairness when it is used to make a determination about them:

- The PII collected for use in the system is NOT used to make adverse determinations about an individual's rights, benefits, and privileges under federal programs.

2. *Technical Controls*

- No additional technical controls are available to ensure accuracy, relevance, timeliness and completeness.

Data-Mining

As required by Section 804 of the [Implementing Recommendation of the 9/11 Commission Act of 2007](#) ("9-11 Commission Act"), Treasury reports annually to Congress on its data mining activities. For a comprehensive overview of Treasury's data mining activities, please review the Department's Annual Privacy Act and Data Mining reports available at: <http://www.treasury.gov/privacy/annual-reports>.

Section 5.7 Is the PII maintained in the system used to conduct data-mining

- The information maintained in this system or by this project *is not* used to conduct "data-mining" activities as that term is defined in the 9-11 Commission Act. Therefore, no privacy or civil liberties issues were identified in responding to this question.

Computer Matching

The Computer Matching and Privacy Protection Act (CMPPA) of 1988 amended the [Privacy Act](#) by imposing additional requirements when Privacy Act systems of records are used in computer matching programs.

Pursuant to the CMPPA, there are two distinct types of matching programs. The first type of matching program involves the computerized comparison of two or more automated federal personnel or payroll [systems of records](#) or a system of federal personnel or payroll records with non-federal records. This type of matching program may be conducted for any purpose. The second type of matching program involves the computerized comparison of two or more automated [systems of records](#) or a [system of records](#) with non-federal records. The purpose of this type of matching program must be for the purpose of eligibility determinations or compliance

requirements for applicants, recipients, beneficiaries, participants, or providers of services for payments or in-kind assistance under federal benefit programs, or recouping payments or delinquent debts under such federal benefit programs. *See* 5 U.S.C. § 522a(a)(8). Matching programs must be conducted pursuant to a matching agreement between the source (the agency providing the records) and recipient agency (the agency that receives and uses the records to make determinations). The matching agreement describes the purpose and procedures of the matching **and** establishes protections for matching records.

Section 5.8 Records in the system used in a computer matching program

- The information maintained in the system *is* part of a Privacy Act system of records, but *is not* used as part of a matching program.

Section 5.9 Is there a matching agreement?

- N/A

Section 5.10 What procedures are followed before adverse action is taken against an individual who is the subject of a matching agreement search?

- N/A

Information sharing with external (i.e., outside BEP) organizations and individuals

Section 5.11 PII shared with/disclosed to agencies, organizations or individuals outside BEP

- PII maintained in the system is *not* shared with agencies, organizations, or individuals external to Treasury.

Section 5.12 Accounting of Disclosures

An accounting of disclosures is a log of all external (outside Treasury) disclosures of records made from a system of records that has *not* been exempted from this accounting requirement. This log must either be maintained regularly or be capable of assembly in a reasonable amount of time after an individual makes a request. Certain system of records may be exempted from releasing an accounting of disclosures (e.g., in law enforcement investigations).

Section 4.4(c) Making the Accounting of Disclosures Available

- No external disclosures are made from the system.

Section 5.13 Obtaining Consent Prior to New Disclosures Not Authorized by the Privacy Act

Records in a system of records subject to the Privacy Act may not be disclosed by 'any means of communication to any person or to another agency' without the prior written request or consent of the

individuals to whom the records pertain. 5 U.S.C. Sec. 552a(b). However, the Act also sets forth twelve exceptions to this general restriction. These 12 exceptions may be viewed at: <https://www.justice.gov/usam/eousa-resource-manual-139-routine-uses-and-exemptions>. Unless one of these 12 exceptions applies, the individual to whom a record pertains must provide their consent, where feasible and appropriate, before their records may be disclosed to anyone who is not listed in one of the 12 exceptions. One of these 12 exceptions also allows agencies to include in a notice published in the Federal Register, a list of routine uses. Routine uses are disclosures outside the agency that are compatible with the purpose for which the records were collected.

Section 4.4(e) Obtaining Prior Written Consent

Section 6: Compliance with federal information management requirements

The Paperwork Reduction act

The [PRA](#) requires OMB approval before a Federal agency may collect standardized data from 10 or more respondents within a 12-month period. OMB also requires agencies to conduct a PIA (a Treasury PCLIA) when initiating, consistent with the [PRA](#), a new electronic collection of PII for 10 or more persons (excluding agencies, instrumentalities, or employees of the federal government).

Section 6.1

- The system maintains information obtained from individuals and organizations who are not federal personnel or an agency of the federal government (i.e., outside the federal government)

Records Management - NARA/Federal Records Act Requirements

Records retention schedules determine the maximum amount of time necessary to retain information in order to meet the needs of the project or system. Information is generally either disposed of or sent to the National Archives and Records Administration (NARA) for permanent retention upon expiration of this period. If the system has an applicable SORN(s), check the “Policies and Practices for Retention and Disposal of Records” section.

Section 6.2

- The records used in the system are covered by a NARA's General Records Schedule (GRS). The GRS is: *GRS 3.2: Information Systems Security Records, Item 31: System Access Records. These records are*

created as part of the user identification and authorization process to gain access to systems. Records are used to monitor inappropriate systems access by users. Includes records such as: • user profiles • log-in files • password files • audit trail files and extracts • system usage files • cost-back files used to assess charges for system use Exclusion 1. Excludes records relating to electronic signatures. Exclusion 2. Does not include monitoring for agency mission activities such as law enforcement. Systems requiring special accountability for access. These are user identification records associated with systems which are highly sensitive and potentially vulnerable. Disposition Instructions: Temporary. Destroy 6 years after password is altered or user account is terminated, but longer retention is authorized if required for business use. Disposition Authority: DAA-GRS-2013-0006-0004

E-Government Act/NIST Compliance

The completion of Federal Information Security Management Act (FISMA) Security Assessment & Authorization (SA&A) process is required before a federal information system may receive Authority to Operate (ATO).

Section 6.3

- The system last completed an SA&A and received an ATO on: 06-28-2024

Section 6.4: Section 508 of the Rehabilitation Act of 1973

When Federal agencies develop, procure, maintain, or use Electronic and Information Technology (EIT), Section 508 of the Rehabilitation Act of 1973 (as amended in 1998) requires that individuals with disabilities (including federal employees) must have access and use (including privacy policies and directives as well as redress opportunities) that is comparable to that which is available to individuals who do not have disabilities.

Section 7: Responsible Official Certification

I reviewed all PCLIA responses, confirming the system's current, accurate status: Yes

Approval Signature

Bureau Privacy and Civil Library Officer

Date signed: 07-18-2025
